Structurflex LLC Kansas City, MO Wins 2019 International Achievement Award

(Orlando, Florida – Oct. 3, 2019) – **Structurflex LLC Kansas City, MO**, was recognized with the 2019 International Achievement Award (IAA) for design excellence in specialty fabrics applications.

Structurflex LLC Kansas City, MO received an Award of Excellence for its **University of Cincinnati Gardner Neuroscience Institute (UCGNI)** project. The project was recognized in the competition's **Facades** category.

For seven decades, IAA has recognized excellence in design and innovation, highlighting truly spectacular work in the specialty fabrics and technical textiles industry. The International Achievement Awards competition is sponsored by IFAI, a not-for-profit trade association who's over 1,600 member companies represent the growing international specialty fabrics and technical textiles marketplace.

IFAI received a total of 255 entries from 14 countries that were submitted for 42 categories in this year's competition. Winners were selected based on complexity, design, workmanship, uniqueness and function. Judges included industry experts, editors, architects, educators and design professionals who were chosen for their knowledge in a particular field of study or product area.

All entries receive prominent recognition at the IFAI Expo, the largest specialty fabrics tradeshow in the Americas. Winners receive additional publicity through coverage in IFAI magazines and press releases distributed to media professionals.
